

## Amendments to the Claims

This listing of claims shall replace all prior versions, and listings, of claims in the instant Application.

### In the Claims:

1. (currently amended) A detergent composition comprising a gel having a water content of from 5 to 65% by weight the gel having a first colour and primary particles having a second colour and a detergent active which is at least partially encapsulated within the primary particles, wherein radiation emitted by the gel interacts with radiation emitted by the primary particles such that at least a portion of the composition has a third colour.
2. (currently amended) A semi-opaque detergent composition comprising a gel having a water content of from 5 to 65% by weight the gel having a first colour and primary particles having a second colour and a detergent active which is at least partially encapsulated within the primary particles, wherein radiation emitted by the gel interacts with radiation emitted by the primary particles such that at least a portion of the composition has a third colour.
3. (currently amended) A detergent composition comprising a gel having a water content of from 5 to 65% by weight the gel containing primary particles having a first colour and secondary particles having a second colour and a detergent active which is at least partially encapsulated within the primary particles, wherein radiation emitted by the primary particles interacts with radiation emitted by the secondary particles such that at least a portion of the composition has a third colour.
4. (currently amended) A detergent composition comprising a gel having a water content of from 5 to 65% by weight the gel having a first colour containing primary particles having a second colour and secondary particles having a

third colour and a detergent active which is at least partially encapsulated within the primary particles, wherein radiation emitted by the primary particles interacts with the secondary particles and the radiation emitted by the gel such that at least a portion of the composition has a fourth colour.

5. (currently amended) A composition according to claim 3, wherein the secondary particles are in the form of emulsion particles (~~micelles~~), suspended particles or gas bubbles (~~preferably air~~).
6. (previously presented) A composition according to claim 3, wherein the secondary particles are at least partially reflective.
7. (previously presented) A composition according to claim 3, wherein the secondary particles have a particle size of less than 50 $\mu$ m.
8. (previously presented) A composition according to claim 1, wherein the composition has a transmittance of from 30 to 90.
9. (canceled)
10. (currently amended) A composition according to claim 9 1, wherein the primary particles are water soluble and comprise a water-soluble encapsulating agent.
11. (previously presented) A composition according to claim 10, wherein the water soluble particles comprise at least 0.3 wt % of the detergent composition.
12. (currently amended) A composition according to claim 9 1, wherein ~~the migration speed of the particles is~~ have a migration speed of less than 1.0 cm per month.

13. (previously presented) A composition according to claim 1, wherein the gel has a viscosity greater than 4,000 mPas.
14. (previously presented) A composition according to claim 1, wherein the gel contains a thickening agent, preferably polyacrylic acid.
15. (previously presented) A composition according to claim 1, wherein the gel has a density of greater than 1.1 g/cm<sup>3</sup>.
16. (canceled)
17. (canceled)
18. (currently amended) A composition according to claim ~~17~~ 1, wherein the composition has a salt content of at least 70% by weight.
19. (original) A composition according to claim 18, wherein the salt is a phosphate, citrate or sulphate salt.
20. (previously presented) A composition according to claim 11, wherein the detergent active comprises one or more of an enzyme, a bleach activator/ catalyst or a fragrance.
21. (currently amended) A composition according to claim ~~1~~ 20, wherein the particles contain a stabilising aid for the enzyme.
22. (previously presented) A composition according to claim 10, wherein the encapsulating agent comprises a coating for the particles.

23. (currently amended) A composition according to claim 22, wherein the encapsulating agent comprises 2 to 15% by weight of the particle.
24. (previously presented) A composition according to claim 10, wherein the encapsulating agent comprises a portion of the core of the particle.
25. (currently amended) A composition according to claim 24, wherein the encapsulating agent comprises at least 10% by weight of the particles.
26. (previously presented) A composition according to claim 10, wherein the encapsulating agent contains a plasticiser.
27. (previously presented) A composition according to claim 26, wherein the plasticiser is a polyglycol or a nonionic surfactant.
28. (previously presented) A composition according to claim 26, wherein the encapsulating agent is a cellulose derivative, a polyvinyl alcohol or an admixture thereof.
29. (previously presented) A composition according to claim 1, wherein the gel and the primary particles have a difference in density of no greater than 0.9 g / cm<sup>3</sup>.
30. (previously presented) A composition according to claim 29, wherein the primary particles contain a density aid.
31. (currently amended) A composition according to claim 1, wherein more than 80% by weight of the primary particles have a particle size from 50 to 1,000 micrometres.

32. (previously presented) A composition according to claim 1 for use in dishwashing or laundry applications.
33. (previously presented) A composition in accordance with claim 1, wherein the composition is disposed in a pouch of polyvinylalcohol.
34. (currently amended) A method of dishwashing or laundry comprising the use step of providing a detergent composition in accordance with claim 1.
